

How I do it – 19th edition

**Educational workshop
Lucerne, September 26, 2026**

**Swiss Young Surgeons &
ForKidS- Forum of Young Pediatric Surgeons Switzerland**

Description

The motto of the event is "How I do it" and will consist of presentations of 30 minutes each (incl. discussion) on common surgical procedures. The aim is not to provide information on clinical pictures in the classical sense with diagnostics, indications, etc. rather a step-by-step description of how a particular procedure should be done and, of course, what to avoid ("pitfalls"). Simply said - the craft of surgery. Participants on this day will be given a hand-out for each presentation on which the speakers have retained their step-by-step instructions. Lunch, aperitif and drinks included.

Hands-on-simulations and prizes

Once again this year, our sponsors will be giving away great prizes to the winners of the Games and Tombola.

Now it's time to get hand-on: put your surgical skills to the test, take on the challenge and beat the

competition. The Game will be sponsored by Swiss-MIS and will feature the Lübecker Toolbox by Corza Medical, giving participants the chance to demonstrate their precision, dexterity and surgical technique in a practical simulation setting.

The Tombola prize will be a one-year membership to JOMI, the Journal of Medical Insight, giving the winner access to peer-reviewed surgical video content and valuable educational resources.

Join in - It is worth it

Program

08.00	Registration and coffee
08.45	Welcome by the SYS Team-members

Principles of Basic Surgery

Chair: Prof. Dr. med. Valentin Neuhaus & Dr. med. Ida Flüglistaler
